SERVICE DEFINITIONS

MENTAL HEALTH SERVICES

Outpatient Treatment Clinic: Facility that provides comprehensive assessment, screening, and treatment services as well as psychiatric services, family, individual, and group counseling, and referral services.

Inpatient Services: A 24 hours per day hospital based program which includes psychiatric, medical, nursing, and social services, which are required for the assessment and/or treatment of a person with a primary diagnosis of mental illness who can not be adequately serve in the community.

Crisis/Emergency Services: Activities aimed at stabilizing occurrences of individual/family crisis where it arises. Services include are screening, assessment, stabilization, triage, and/or referral to an appropriate program or programs. This can also be in a hospital setting: A hospital based program which offers access to crisis outreach, interventions, and residential services and/or provides beds for the extended observation (up to 72 hours) to adults who need emergency mental health services.

Peer Services: Persons with lived experience trained to work with people.

Family Support: Training and counseling services for the families of individuals served. Family is defined as the persons who live with or provide care to a person served, and may include a parent, spouse, children, relatives, foster family, or in-laws.

Respite Services: Short-term relief to individuals who are caring for family members who might need more support outside of the home. There are various models for providing respite care depending on how much support is needed. (NAMI).

Vocational Services: Services that help overcome barriers to access, maintaining or returning to employment or other occupations.

Care Management: Care coordination, health education and management support, transition services, direct social service support, individual and family support via New York State Health Home or the Staten Island CARES program services.
